Acknowledgements

This thesis is a team effort. There are many people around me along the journey without whom this thesis would not have been possible. I sincerely appreciate their tremendous technical contributions and emotional support.

First of all, I would like to thank my advisor Prof. Min Jin for her excellent guidance and consistent support. I am extremely grateful to her for giving me the opportunity to pursue my PhD with her, for her inspiring guidance and valuable advice throughout the process, for encouraging me and shaping my thinking of research, and for taking me into a fantasy world and leading me on a fast track of my career. I firmly believe that it is just the beginning and our collaboration will remain strong in the foreseeable future.

I am very blessed and gratified to have an incredible family, especially I would like to thanks my father, who has selflessly spent his best on his children's education. I am incredibly thankful to my mother for her prayers and keeping me spiritually upright with a strong sense of morals.

I am very grateful to the Chinese government, for offering the learning atmosphere and the scholarship required to accomplish this goal. Thanks a million to Hunan University, for providing the nice work environment. I am pleased to the staff members in the Graduate and International Student Office for their administrative efforts.

My words of thanks to my special friends Rashed Akand, Vinal Ansari, Nipun, and Rezuwanul Islam; for their unconditional support and cheering all the time for my research project during my study. I also want to thanks all my lab colleagues, specially Pan Zeng, for his valuable tips and help throughout my stay in China.

Last but not least, I would like to pay my highest regards to my wife Habiba Begum, my sisters: Fatahia Nasrin and Faouzia Nasrin my brothers-in-law: Abu Sayeed and Golam Rabbani for their unconditional love and support. It is a great pleasure to thank everyone who cheered me and believed that I could do it.
